

APEX™

Stainless Steel, Condensing, Gas-Fired Commercial Boiler

- 95% Thermal efficiency
- 425, 525, 625, 725, 825 Models
- Advanced stainless steel heat exchanger
- Lowest waterside pressure drop in class
- Minimized electrical consumption
- 5-to-1 modulation
- Less than 20ppm NOx
- Stackable; space savings with no stands
- EMS compatible

Refined Commercial Condensing

Robustly designed for commercial environments, the Apex, with thermal efficiency ratings of 95%, combines durability and performance. Coupled with an intuitive, multi-function boiler control with touchscreen display designed to optimize boiler and system efficiency, the Apex delivers longevity with top-rated efficiency.

Heat Exchanger

The latest Apex models are equipped with next generation watertube technology which minimizes water side pressure drop by over 40%. The heat exchanger reduces pump motor sizes by 30%, which curtails electrical consumption and triples yearly operational savings.

- 40% Less Waterside Pressure Drop
- 30% Smaller Pumps
- 40% Less Watts
- Triples Yearly Operating Savings!

Boiler	Pump HP	Amp Draw	Watts	Yearly Operating Cost (US-\$)*
Apex**	1/6	1.9	218.5	58.44
Competitor	1/2	4.9	563.5	150.73

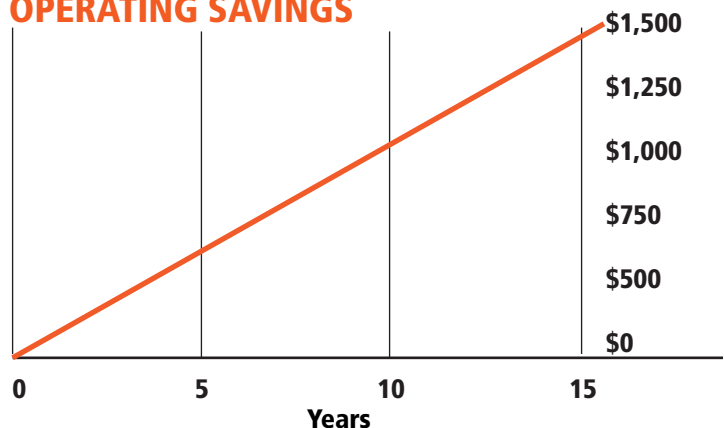

*Based upon AHRI runtime of 2,500 hours and 10.7¢ per KW/hr.

** Apex 625

Selecting an APEX designed with low waterside pressure drop permits a pump selection of 1/6 HP vs. competitive models at 1/2 HP or higher. The smaller pump will provide up-front savings on installation costs, and the lower electrical cost will provide savings year-after-year for the life of the boiler. The end result is a quicker payback on investment.

OPERATING SAVINGS

Boiler Control System

The “brains” behind the brawn of our commercial heat exchanger is incredibly advanced, yet uncomplicated to operate. It requires just four inputs for set-up, but is programmable to optimize efficiencies over the broad spectrum of virtually all heating parameters.

SIMPLE

- Four (4) inputs for set-up
 - ^a RJ45 ethernet cord for peer-to-peer boiler connection
- Paragraph formatted diagnostic read-outs – no codes
- Advanced touchscreen
- Slide-out drawer for easy access
- 4-20mA heat demand contact for external control correction
 - Modbus protocol (optional BACnet™ or LonWorks™ gateway)
 - EMS controls set-point or firing rate

SMART

- Data logging in cycles and hours for pump operations offering advanced system optimization
- Three (3) pump outputs
- Outdoor reset
- Warm weather shutdown
- Freeze protection & pump exercising
- Built-in brown-out protection
- Stackable for space savings with no extra stands

MORE SAVINGS

- Advanced modulating control with baseloading
 - Maximizes low-fire rates with multiple boilers
- Anti-cycling programming
 - Capable of limiting fan speeds and output based on delta Ts

LEFT SIDE

FRONT

Notes:

1. Access panels – qty. of (2) on Model 525 and qty. of (4) available on Models 625 - 825
2. Lifting handles – available on Model 525 but NOT on Models 625 - 825
3. Relief/Drain Tapping – Not available on Models 625 & 725; Relief/Drain piped off the Supply Piping
4. Factory provided socket end compression pipe joining clamp for 3/4" schedule 40 PVC pipe

Standard Equipment

ASME stainless steel heat exchanger
 Stainless steel mesh burner
 Full modulation, 5:1 turndown
 Variable speed combustion blower
 Zero governor gas valve
 Supply & return temperature sensors
 Flue gas temperature sensor
 Sealed control compartment
 Negative pressure lower cabinet
 Outdoor air temperature sensor
 Front-mounted terminal strip
 Low voltage terminal strip
 Line voltage junction box
 Condensate trap
 Pressure relief valve, 50 psi for 525

Pressure relief valve, 60 psi for 625, 725, 825
 Rear flue outlet
 Stacking boiler brackets
 Flow switch

PVC VENT KIT:
 30" CPVC, 90° elbow
 (2) vent terminals w/ rodent screens

SAGE2.1 BOILER CONTROL:
 Touchscreen display
 Built in diagnostics
 Slide-out drawer
 Lead/lag and domestic hot water priority
 Warm weather shutdown
 4-20 mA inputs for external modulation

Optional Equipment

Condensate neutralizer
 Header sensor - required for multiple burner systems
 Header sensor, alternative immersion
 RJ45 cable splitter
 80 psi relief valve (all models)
 100 psi relief valve (all models)

ASME CSD-1 kit – includes high limit (manual reset), high and low gas pressure switches (manual reset), gas valve seat leakage test harness
 Low water cutoff
 Universal gateway -BACnet, Meatasys, Modbus, or LonWorks compatible
